## NEW IMPROVEMENTS AT SKEENA HELISKIING

While most people are enjoying the hot weather during August, Skeena Heliskiing is all about winter. We completed 6 weeks of exploration work in our area and found a number of new tree skiing and alpine glacier runs which we can't wait to ski with you this winter.

We're also proud to announce that the Skeena Heliskiing website is up and running after having been victim to numerous hacker attacks. We decided to completely revamp the website, adding new features and making it more user friendly. We're uploading new content every day so be sure to check it out.

Kind regards

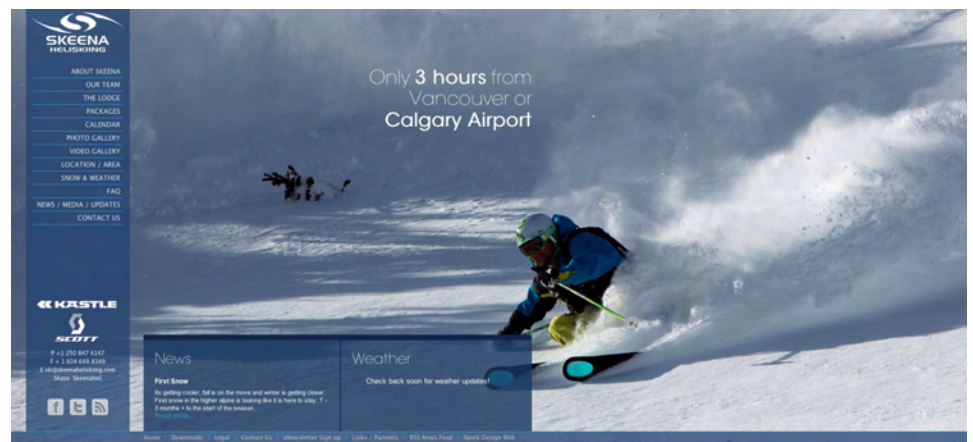

Giacum Frei

Skeena Heliskiing

## NEW WEBSITE WITH BETTER FEATURES

Many thanks go to the team at sparks design for the great work. <http://www.sparkdesignco.com>

## NEW RSS LINK

If you have been using our old RSS link, please update your reader / email client to our new URL. Active since Sept 15.

<http://www.skeenaheliskiing.com/rss/>

## THE KISPIOX VALLEY IN THE SUMMER

Have you ever wondered what it looks like in summer in the Kispiox Valley? Take a look at our new photos in the photo gallery:

<http://www.skeenaheliskiing.com/photos/summer-in-the-kispiox-valley/>

## MORE NEW RUNS THIS COMING WINTER

Recognise this picture? In the photo on the right hand side is a classic run called "Pure Gold" which you have probably skied before. This is one of the areas we worked at this summer, scoping new pick-up and drop-off zones to add more variations to the runs in a single zone. Clients will notice the improvements especially during low visibility conditions where we can maximise your skiing time.
